```

Kevin,

This is the Jiff Mart property with suspect floor tile in the parking lot.
Sorry for long delay - this $30 VISA purchase has been a huge hassle to get
done.

The testing lab reported the results this PM, so I am enclosing the COC and
draft lab report. I won't have the final report for about 3 days - will
forward when I can get it from the testing laboratory.

Yes, it is non-friable asbestos-containing vinyl tile, 4 - 5% chrysotile.
Spoke with Marlow Laubach about it, and I'll discuss further with Emile (he's
done abatement project work before). ACM percent is high enough that the
work needs to be done by asbestos-removal trained people, not just awareness
level trained.

This will be a changed condition item, so Construction Branch will need to
establish a scope and price with Q2. Have spoken with Dan Roper, we can
request a cost proposal from Q2 to arrange a local subcontractor to do wet
removal of the tile fragments, double bagging of the tile, transportation,
and disposal in a permitted asbestos landfill.

Want to verify that this is consistent with your prior direction to arrange
removal if it came back as asbestos-containing material.

Harry Ehlers

Harry, this is the Jiffy mart that had the apparent ACM. Did the sample
collected by Emile get tested? Close-out of this address is pending the
results. Thanks...Dan
